Are You Experiencing Migraine Headaches?

Some Migraine studies estimate that 13 percent of adults in the U.S. population have migraines, and 2-3 million in the U.S. population have Migraines, and 2-3 million Migraine sufferers are chronic. Almost 5 million in the U.S. experience at least one Migraine attack per month, while more than 11 million people blame Migraines for causing moderate to severe disability. *

You may qualify to participate in a clinical research study of an investigational medication to see if it can help prevent your Migraine Headaches if you are:

- **18 year of age**
- **Have Migraine**
- **Migraines lasting 4-72 hours**
- **4 to 14 migraine attacks per month
Within the last 3 months**

If you qualify, you will receive all study related procedures and investigational drug at no charge. You may be compensated for time and travel.
